

These are the instructions for the Final Presentation required for every credentialing course. Keep this in mind while you progress through your course.

You must enroll in a course for at least 14 days before the final section of that course opens for you. We did this to ensure our courses may be worth academic credit. There is no way to override this requirement. If you reached the end of the course before the 14 days, we recommend that you start on another course while you wait.

Final Presentation

Assignment

Submit a video presentation of you **teaching** the material that you learned in this course.

Assignment Details

- This presentation should be about 5 minutes long, but please do not go over 6 minutes.
- Please use visual aids such as slides, pictures, titles, etc..
- You are not required to cover the content from every section of the course. You should choose a few main ideas from the course and center your presentation around them.
- Remember, this video is you teaching the material, not saying what you learned.
- Teach as if your audience does not know the topic.

Submission Instructions

- Create and record your presentation as a video.
- Upload your video to YouTube. Please do not upload your video through the "Upload a file" button.
- Submit the youtube video URL through the "text reply" button.
